Simple Ground Equipment & Services

Milestones (4)

April 2026 – November 2026

Updates and milestones

Version 79.1, 5th of April, 2026

- Replaced the fuel truck by the new X-Plane 12.4.1 fuel truck with a custom refueling kit
- Replaced the catering truck by the new X-Plane 12.4.1 European flatbed lorry

Version 79.2, 13th of April, 2026

- Minor adjustment in X-Plane 12.4.1 to restore the ability to display alternative fuels trucks
- Changed the Front Line module: better memory management, added ground objects, allowed optional assets to be downloaded from the Org and installed in SGES folders (FlyWithLua/Scripts/Simple_Ground_Equipment_and_Services/Front_Lines_optional_objects/readme.txt)
- Tailored ground kit for the Embraer ERJ 145 v2 by X-Craft

Version 79.3, 16th of April, 2026

- Minor adjustments in X-Plane 12.4.1 to restore display of alternative catering trucks
- Tailored ground kit for the FF/STS 777-300ER released today by FF/STS

Version 79.4, 18th of April, 2026

Emergency bug fix for airliners ground handling assets (prevents a Flywithlua crash)

Available in the Org and in SkunkCrafft Updater (beta AND stable channels)

Version 79.5, 3rd of May, 2026

- Disabled by default the Felis Boeing 747-200 automated crew

Version 79.6, 22th of May, 2026

- Prevents a crash with the **FREE E-Jets** by X-Craft
- Updates **cargo set** for the B757SF/F, B767RF/F, BAe-146QT, A320P2F, A321P2F under certain conditions
- Enhanced options for cargo loaders
- **Boeing 737-200 Classic** enhanced support
- Added a checkbox to toggle all **Felis B747-200 hatches** at once
- Reworked the graphical options menu
- After reports from **SimLoadManager** users, changed the SGES chocks function to remove any problem related to the aircraft heading before displaying the trucks.
- Removes LuaJit option for Felis 742, now the 742 normally takes the setting into account
- Made **X-Plane chocks option** persistent across sessions
- Improved **GPU** handling for **Thranda**/JustFlight planes

Version 80, 25th of June, 2026

- Added a tailored set for **the A310 and A310F** by *CremonaSoft* (user request) and for the V35 Bonanza
- Repaired the combat functions when destroying the SAM site with weapons (user feedback)
- Added **IVAO / VATSIM / Pilot Edge ATIS** via the Hoppie Network (a Hoppie ACARS logon code is required)
- Added direct METAR retrieval
- Added **vehicle toggles** (piece of code kindly submitted by @RackhamRPL)
- UI tweaks

Version 80.1, 29th of June, 2026

- Routed through the ToLiss Airbus and the Flight Factor 777 display units the METARS and ATIS requested in the Hoppie Network - no change for other models

- ToLiss Airbus models: changed the door opening code (safer), to allow companion script *speedy copilot for toliss* 11.2 own's changes - no change for other models
- Code housekeeping

Version 81, 26th of September, 2026

- Added a button "Serv." to call the X-Plane native airport services (requires airliner)
- Added helicopter dolly (requires flat terrain)
- Added a bulk loader to the Airbus A320, A330, A340, B777, B787, B747 series
- Added the accessible passenger boarding ramp (requires X-Plane 12.4.4). Object not animated, only standing by.
- Preparations made to support the Metroliner III by Retro Wings, currently based on Starving Pilot Metroliner geometry
- Bug fixes:
    1. never display individual passenger luggage on the ground when the cargo is containerized
    2. corrected a problem with the bus animation
    3. corrected a faulty push-back animation trigger
    4. corrected missing flames and smoke on AI plane crash site when in no-respawn mode

Version 81.1, 14th of October, 2026

- Added the rear baggage animation
- Refined the Boeing 737-200 ground services
- Corrected a bug when releasing the push back truck

Version 81.2, 17th of October, 2026

- Position saving of the SGES menu fully rewritten.
- Made adaptations to FlyWithLua 2.8.17
- Kept backward compatibility with older version of FlyWithLua (prior to 2.8.16).
- Manuals updated (again)

Version 81.3, 4th November, 2026

- Adding ATR 72-600 custom geometry
- Adding **DeltaWings Sim ATR 72-600** tailored support
- Added **SGES auto-update** : now you can remove Skunkcrafts Updater and update directly in game (Curl is required on your system). (Skunkcrafts configurations are still available as a backup).

Version 81.4, 6th November, 2026

- Restored the state as provided by the aircraft model after chocks or pushback application (restores DeltaWings Sim ATR 72 custom power management)
- Removed Skunkcrafts Updater configurations.
- Removed a PopStyle error in the menu, when using helicopters
